

HARNESS THE POWER OF TECHNOLOGY IN A REGTECH/GOVTECH SOLUTION FOR REVENUE ASSURANCE AND TAXATION COMPLIANCE

Traffic and Revenue Monitoring for Taxation Assurance

Key Capabilities

End-To-End Solution

HARNESS THE POWER OF TECHNOLOGY IN A REGTECH/GOVTECH SOLUTION FOR REVENUE ASSURANCE AND TAXATION COMPLIANCE

Collection

Passive probes

Non-intrusive and independent approach to generate traffic events, including events for zero-duration calls

Direct Integration

Collects xDRs via secure IP connection (FTP, SFTP, etc.), supports both push and pull collection

Mediation

xDR Normalization

Automatically decodes, enriches and normalizes xDRs into ready to process mediated xDRs

Independent information flows

Uses cash flow, realized revenue and traffic information to correlate events and ensure tax compliance

Aggregation and Processing

xDR Processing

Processes mediated xDRs for generation of operators' traffic and revenue information

Traffic & Revenue categorization

5-level traffic and revenue categorization for a 360° view of the operators' business

Auditing

Reconciliation Management

Generates traffic reports, verifies operators' declaration, & produces tax & revenue declaration sheets for reconciliation

Tax Reporting

Generates Regulatory & Government tax reports based on collected and validated information

Presentation

Data Visualization

Generates revenue and usage dashboards, strategic KPIs (active subscriber base, ARPU, MOU, ACD), and displays traffic KPIs on GIS map

Logging & Monitoring

Displays collection & mediation logs for better monitoring of the processes' execution
