

# ELEVATE YOUR TELECOM BUSINESS WITH ADVANCED MANAGEMENT SOLUTIONS

## Wholesale & Interconnect Management

## Key Capabilities

- Efficient Partner Management
- Prepaid/Postpaid Account Management
- Enhanced Billing Precision with OBR
- Origin-based buy/sell offer management
- Efficient Billing and Settlements
- Dispute Resolution
- Customizable Rules
- Customizable Routing Policies
- Technology-agnostic Routing
- Optimized Call Routing Efficiency with OBR
- Multi-Switch Support
- Real-Time Monitoring and Alerts
- Comprehensive Traffic Monitoring and Analysis
- Fraud Prevention
- Scalability Redundancy and Flexibility
- Seamless Integration and API Support

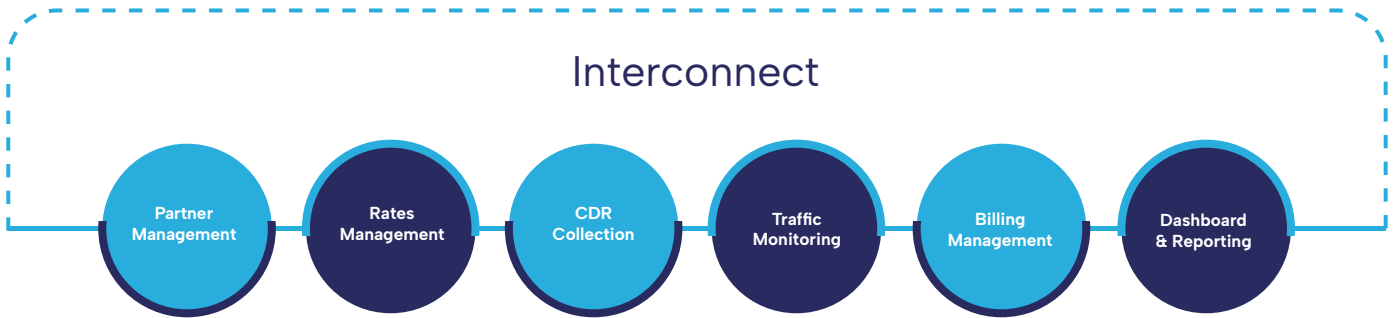

# ELEVATE YOUR TELECOM BUSINESS WITH ADVANCED MANAGEMENT SOLUTIONS

## End-To-End Solution

### Wholesale

### Interconnect

#### Administration

Administration module controls settings, user roles, audit logs, and system customization

#### Business Entities

Efficiently manage carrier profiles, accounts, contracts, and financial, with detailed tracking of agreements and payments, for diverse carriers in the interconnect business

#### Rates Management

Optimize telecom rates with customizable plans, margin analysis, code accuracy, targeted rate matching, efficient pricelist imports, and flexible pricing rules for enhanced margin optimization

#### Routing

Streamline telecom management with strategic rate cost analysis, customizable routing, dynamic route management, and seamless network updates to meet complex routing and financial objectives

#### Billing

Improve financial operations with automated invoicing, efficient dispute resolution, real-time credit alerts, and advanced account management, complemented by real-time, customizable billing reports for deep revenue and loss insights

#### Deals

Enhance deal management with analytical tools for revenue and savings, customizable swap deals, volume commitments with tiered pricing, and progress monitoring with alerts to optimize deal performance

#### Traffic Analysis

Streamline operations with the system's advanced traffic monitoring, customizable analytics and dashboards, NOC-managed fault ticketing, and detailed traffic analysis with alerts from the Data Analysis module, improving insights and security

#### System Processes

Optimize data and CDR management with configurable data sources, efficient processing and reprocessing, automated business workflows, and advanced traffic analysis with alerts via a business intelligence tool

#### Third-Party Integration

The system streamlines integration with Billing, Mediation, BI, CRM, and ERP systems through secure, standard-compliant APIs, enabling efficient data transfers, including CDR and log transfers. It enhances efficiency and data integrity, with seamless rate sheet updates for Billing, ensuring consistent accuracy across infrastructure
